Sir:

In the Notice of Allowability mailed November 4, 2004, the Examiner indicates:

The primary reason for the indication of the allowability of the above claims is the inclusion therein, in combination as currently claimed, of the limitation of a semiconductor die including a dam connected to the heat sink, the dam is located on the lower surface of the heat sink and extending around the peripheral thereof. This limitation is found in the above claims and is neither disclosed nor taught by the prior art of record, alone or in combination.

Applicants concur with the reasons as stated by the Examiner insofar as they comprise a summary, and are exemplary and not limiting. However, the independent claims as allowed include other and different language than that specified by the Examiner, and the allowed dependent claims include other and further features and elements. Accordingly, the scope of the claims must be determined from the literal language of each as a whole, as well as equivalents thereof.
